establish or operate a business

overview

Starting a business can be an exciting – and demanding – experience. It comes with the promise of new challenges and opportunities, as well as the day-to-day operational tasks and long-term strategic planning that build value. Operating a business requires enterprise-wide expertise including everything from managing employees and suppliers to developing intellectual property and new client relationships to understanding tax issues and regulatory requirements.

Both are responsibilities that can benefit from experienced advisors who understand the complexities of running a successful organization from top to bottom.

McMillan's practitioners work with businesses across Canada and internationally on the key strategies that help them grow and reach their goals. We deliver practical advice to assist companies with everything from financing, tax planning and regulatory compliance to equipment leasing and establishing agreements with suppliers, customers and employees.
