do business in Canada

overview

The wealth of Canada's natural resources, its strong economy, and stable government and banking environment makes Canada a sought-after nation for trade, investment and doing business.

But thriving in the sometimes uncertain global economy takes significant know-how and organizations operating in Canada can benefit from the guidance of experienced professionals to:

- navigate foreign investment rules
- understand provincial and federal labour laws
- keep up with business tax rules and regulations
- deal with government on public policy issues
- ensure compliance with regulatory rules and policies
- manage a successful business that meets strategic goals

McMillan professionals understand the risks and challenges faced by Canadian business and can help you build long-term plans for success. We focus on the industry-specific aspects of your business that can bring you the greatest value, covering everything from business law to financing to government relations.

For new investors, we have developed a Passport to Canada, a suite of services to assist in the set-up of Canadian operations – including entity formation, advice of employment, privacy and tax matters – that we provide for a predictable fixed fee. Welcome to Canada!
