

# THE PRESENT AND FUTURE OF A.I. REGULATION

Posted on June 1, 2023

**Categories:** [Insights](#), [Events](#), [Webinars](#)

Join us for a session with thought leaders who will share valuable insights into the latest trends and developments in artificial intelligence, with a particular focus on regulation. Our panel will cover:

- The current landscape of A.I. regulation
- Upcoming laws affecting the use of A.I. systems
- Proposed legislation impacting A.I. systems
- The practical implications such legislation can or may have on today's businesses
- If such legislation will stifle or encourage innovation in the A.I. space
- How businesses will manage compliance with such legislation, especially given the different approaches taken by different governments to regulating A.I. around the world

For legal practitioners, this program qualifies for up to 1 Substantive CPD Hour in Ontario, 1 CPD hour in BC, and 1 CLE hour in Quebec.
