March 4, 2021

11:00 am – 12:30 pm (MST)

View the recorded webinar [here](#).

Please join us for an engaging panel discussion with experts and thought leaders from the political, academia, legal and business sectors to discuss the national hydrogen strategy. This event will examine the political, regulatory, technical, economic, and environmental opportunities and challenges of hydrogen both at home in Alberta and beyond.

The panel will also address key questions such as:

- What is Alberta's future hydrogen strategy?
- What can we learn from further developed hydrogen industries abroad?
- What do Canadian companies active in hydrogen energy need from government and industry to be successful?
- How do we develop Western Canada's hydrogen industry through both a domestic and an international approach?

Agenda:

11:00 am - 12:00 pm (MST) | Panel Discussion

12:00 pm - 12:30 pm (MST) | Q&A

Access: Viewing instructions will be sent via email to those who RSVP to attend.
