Since 1990, IFLR1000 has published tiered rankings of leading financial and corporate law firms worldwide. Each ranking is based on three key criteria: transactional highlights, peer feedback and client feedback. Together with their firm rankings, IFLR1000 also recognizes the work of outstanding legal professionals. Their individual rankings are based on the same three criteria as their law firm rankings. The guide also conducts analysis of market trends for over 120 jurisdictions globally.

The IFLR recognition confirms McMillan LLP's expertise in a broad range of practice areas and a leader in strategic and legal advice in the Canadian finance industry.
